

The Wheel Restorer has moved to a larger workshop within the same Courtyard of units at the Bersham Enterprise Centre, Rhostyllen, Wrexham. This premise has been specially designed internally to install and utilise a multitude of modern machines and processing equipment to repair and refinish alloy wheels. Since the company was founded in 2006, our reputation and wide range of services has spread not only locally or nationally but also worldwide. We offer a professional service with very high quality paintwork for all automotive vehicles from a Fiesta to a Ferrari.

Our new facility includes a newly commissioned Industrial Oven which will be used for powder coating and curing. This allows us to recoat many sets of wheels in a day as well as producing a high quality long lasting finish for longevity.

With fully kitted out workshop facilities, we can also supply, fit, and digitally balance all major brands of Tyres. We are also able to store your car at our workshop or offer a worldwide collection and re-delivery service.

Our professional service also offers dedicated preparation rooms and a customer reception/waiting area where we can discuss your requirements in person, all geared towards total customer satisfaction.

We specialise in Alloy Wheel Refinishing to produce the best results in many finishes and colours ....
